

CHRISTIAN GONZALEZ

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a focus on front-end development and a strong portfolio of web applications. Committed to crafting intuitive, high-performance user interfaces. Looking to leverage my skills at a tech company with a global reach.

WORK EXPERIENCE

Full Stack Web Developer | founder @zenitzo |

January 2020 — Present

As the founder of Zenitzo, I have dedicated myself to designing, developing, and deploying web applications that resonate with my audience. Utilizing technologies such as React and Next.js, I've created engaging and user-friendly experiences. Through live streaming my development process, I've built a following of over 20,000 on social media and amassed millions of views, showcasing my coding journey and fostering community engagement. Working closely with clients, I ensure their needs are met and deliver projects on time, all while honing my skills in version control with Git and embracing agile development practices. This journey has not only strengthened my technical abilities but has also deepened my understanding of how to create meaningful connections through technology.

Recent Projects:

Brainwave (UI/UX Web App) – Built a modern React and Tailwind website featuring sleek design, responsive layouts, and advanced animations. Focused on code architecture and reusability while incorporating complex UI geometry and the latest design trends.

Carepulse (Fullstack Web App) – Developed a healthcare app with Next.js for patient registration and appointment management. Features include admin tools, SMS notifications, secure file uploads with Appwrite, and performance tracking with Sentry, all while maintaining responsive design and code reusability.

Other Projects: Minecraft server, Los Angeles StarGazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, Apple website using 3d animations with Three.js and GSAP.

Full Stack Web Developer | 100Devs | (Remote)

January 2020 — March 2022

At 100Devs under the guidance of Leon Noel I honed my skills in web development, focusing on technologies such as React and Next.js. This experience allowed me to engage directly with clients, gathering requirements and contributing to project design and implementation. I gained valuable insights into the development process, from initial concept to deployment.

Entry Level Developer | Tech innovations Inc | Miami, FL

June 2019 — December 2019

Collaborated with a team of developers to design and implement responsive web applications using React and Node.js. My role involved assisting in debugging and troubleshooting code, which significantly enhanced application performance and user experience. I contributed to the development of RESTful APIs, improving data retrieval efficiency by 25%. Additionally, I participated in daily stand-up meetings and code reviews, fostering a culture of collaboration and continuous learning.
