CHRISTIAN GONZALEZ

Software Engineer

WORK EXPERIENCE

Full Stack Web Developer | founder @zenitzo |

January 2020 — Present

- Founded Zenitzo, designing and developing web apps that resonate with a diverse audience.
- Live-streamed the development process, growing a social media following of over 20,000 and amassing millions of views which fostered community engagement.
- Honed skills in version control using Git and embraced agile development practices, significantly improving workflow efficiency.
- Utilized React and Next.js to create engaging and user friendly experiences, enhancing client satisfaction.

Full Stack Web Developer | 100Devs | (Remote)

January 2020 — March 2022

- Strengthened web development skills under the guidance of Leon Noel, with a focus on React, and Next.js
- Developed dynamic front-end solutions using a robust tech stack including HTML5, CSS3, Sass, JavaScript, React, Vue, Nuxt, and Netlify CMS, enhancing user interfaces and experiences.
- Created a React and Next.js powered report dashboard, enhancing data visualization and user interaction for over 10 million records.
- Engineered a report search tool using optimized HTML, CSS/Sass, and vanilla JavaScript, improving user ability to quickly locate reports with custom filters.

Front-end Developer | Tech innovations Inc | Miami, FL

June 2019 — December 2020

- Drove collaborative product design and development, bridging communication between stakeholders and engineering teams, resulting in streamlined project workflows and enhanced product outcomes.
- Led a high impact initiative to revamp the front-end of the project and CRM dashboard, contributing to significant project revenue generation.
- Enhanced team efficiency by developing a comprehensive application documentation portal, accelerating the onboarding process for new developers.

Projects:

Zenwave (UI/UX Web App) – Built a modern React and Tailwind website featuring sleek design, responsive layouts, and advanced animations. Focused on code architecture and reusability while incorporating complex UI geometry and the latest design trends.

Carepulse (Fullstack Web App) – Developed a healthcare app with Next.js for patient registration and appointment management. Features include admin tools, SMS notifications, secure file uploads with Appwrite, and performance tracking with Sentry, all while maintaining responsive design and code reusability.

Other Projects: Minecraft server, Los Angeles StarGazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, Apple website using 3d animations with Three.js and GSAP.
