CHRISTIAN GONZALEZ

Miami FL (Open to remote) | 305-458-2542 | christiang.dev@gmail.com

TECHNICAL SKILLS

JavaScript (ES6+), TypeScript, HTML, CSS, Sass, Node.js, React, React Native, Next.js, Vue, Redux, Firebase, Tailwind, Git, GitHub, Figma, Storybook, Webpack, Jest, Agile/SCRUM, Vercel, Netlify, REST, APIs.

EXPERIENCE & PROJECTS

Front-End Software Engineer | Remote   Jan 2022 - Present

Freelance SWE (zenitzo)   JavaScript | Next.js | Node.js | TypeScript | Sentry | Shadcn | Figma

- **Front-End Development Expertise:** Designed and developed dynamic, responsive web applications using Next.js and React, ensuring a seamless user experience across all devices and screen sizes.
- **UI/UX Design Implementation:** Created visually appealing and intuitive interfaces with Tailwind CSS, focusing on user-centric design and maintaining a consistent brand aesthetic.
- **End-to-End Project Management:** Delivered full-stack solutions using Appwrite for authentication and storage, and integrated Sentry for monitoring application performance, handling both front-end and back-end responsibilities.
- **Deployment and Optimization:** Successfully deployed and optimized web applications on Vercel, leveraging its CI/CD pipelines for rapid deployment and maintaining high performance and reliability.

Front-End Engineer, UI Lead | Remote   March 2024

Carepulse Healthcare Management   JavaScript | Next.js | Node.js | Appwrite | Sentry | Twilio

- **Developed a Patient Management System:** Created a comprehensive app using Next.js and React, enabling patient registration, appointment booking, and profile management. Integrated Tailwind CSS for a responsive and modern design.
- **Admin Functionality and Control:** Implemented features for administrators to manage, confirm, and cancel appointments, ensuring efficient handling of scheduling and appointment logistics.
- **SMS Notification Integration:** Leveraged SMS capabilities to send real-time appointment confirmations to patients, enhancing communication and user experience.
- **Performance Monitoring and File Management:** Utilized Sentry for real-time performance tracking and error monitoring, and integrated Appwrite for secure file uploads and storage, ensuring robust application performance and data management.

Front-End Software Engineer | Remote   Jan 2021 - Jan 2022

Independent Contractor   JavaScript | React | HTML | CSS | Sass

- Expertly developed, maintained, and deployed high-quality production code for client websites, utilizing HTML, CSS, Sass, JavaScript, and React, resulting in robust and user-friendly web solutions.
- Conducted comprehensive quality assurance testing across multiple sites, ensuring exceptional cross-browser compatibility and mobile responsiveness, thereby enhancing user accessibility and satisfaction.

Front-End Software Engineer | Orlando   Jan 2019 - Jan 2020

Carroll Bradford   JavaScript | Next.js

- Drove collaborative product design and development, effectively bridging communication between stakeholders and engineering teams, resulting in streamlined project workflows and enhanced product outcomes.
- Led a high-impact initiative to revamp the front-end of the project and CRM dashboard, playing a key role in generating $11 million in project revenue in 2020.
- Boosted end-to-end testing efficiency by implementing automated processes with Selenium, achieving an impressive 90% code coverage, and ensuring higher code quality and reliability.
- Enhanced team efficiency by developing a comprehensive application documentation portal, significantly accelerating the onboarding process for new developers.
